LET THE TRUTH BE TOLD

What have people of African descent contributed to world civilization? The answers are revealed by this new, full-color chart, *World History: An African Perspective*. The chart material is based on the findings of the United Nations Educational, Scientific and Cultural Organization (UNESCO) Nile Conference of 1974.

In order to justify slavery and colonial occupation, there has been a willful distortion of the important contributions Africans have made to world history. Facts have been twisted, falsified, and all together disregarded. The cover-up has been so pervasive that this amended “history” now passes for “truth.” Children in school are given misleading, erroneous, and incomplete information, and are only taught history as it relates to Western civilization’s impact on other peoples of the world.

This deliberate rewriting of history has served to perpetuate many myths and stereotypes, and has ultimately led to ignorance, intolerance, and worse. Now is the time to right the wrongs that have blinded the eyes of the world to the triumphant accomplishments of African peoples. Now is the time to get an African perspective on world history. Let the truth be told.

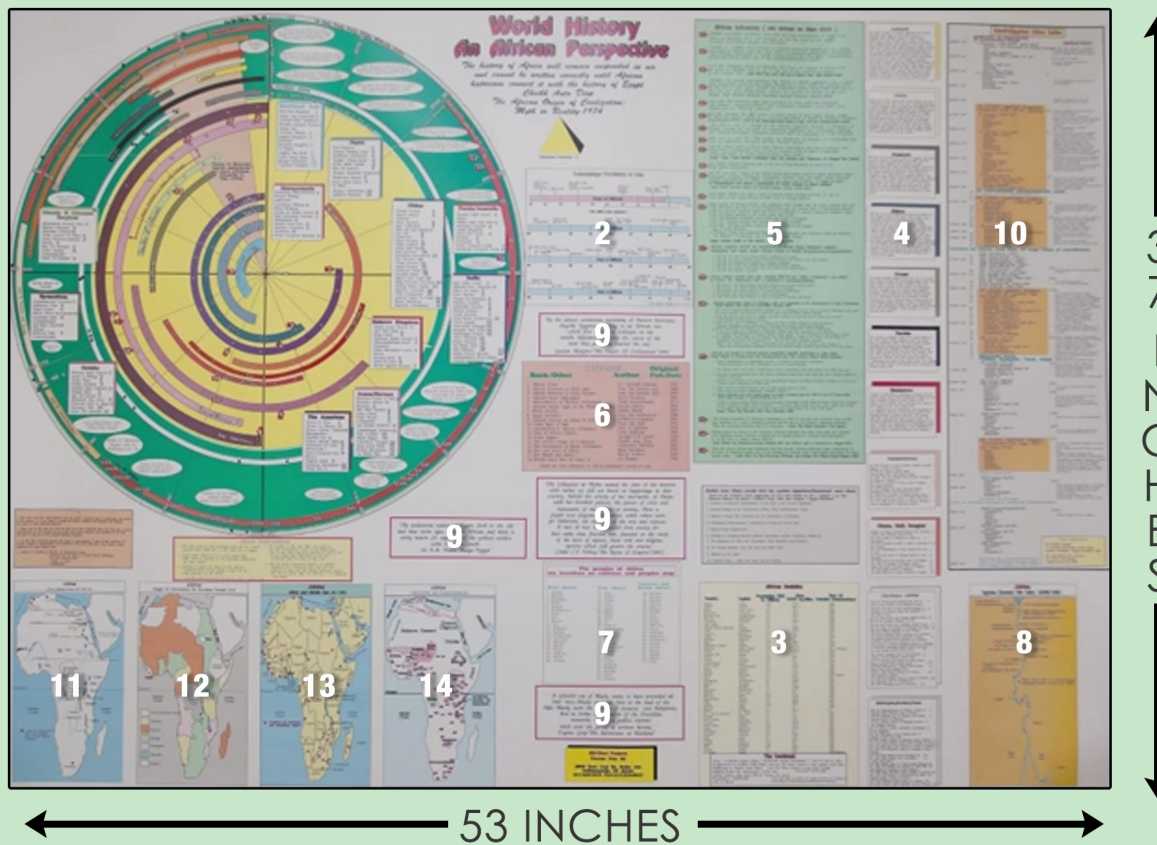

6000 YEARS THE AFRICAN CONTRIBUTION TO WORLD CIVILIZATION

A WHOLE NEW WAY OF LOOKING AT THE WORLD

The World History: An African Perspective wall chart is the ideal tool for students, educators, and families who want to get the truth that cannot be found in textbooks. It offers an authoritative, stimulating overview of forgotten history in an attractive and easy-to-use format.

There is a wealth of fascinating information packed into the 53"x 37" inch chart. Color-coding, cross references, and helpful graphics make it simple to find particular pieces of information and understand how all pieces relate to one another. A bibliography is provided to lead interested readers to further sources of information.

1. 25" time circle of 24 civilizations from 4000 B.C. to the present allowing a comparison of major cultures.
